

### 2015

Brandicourt S., **Nicolas J.**, **Boussard A.**, Riquet A-M (2015). Use of ESR and HPLC system to follow the anaerobic reaction catalyzed by lipoxygenases. *Food Chemistry*, 168, 311-320.

**Degrand L.**, **Rakotozafy L.**, **Nicolas J.** (2015). Activity of carbohydrate oxidases as influenced by wheat flour dough components. *Food Chemistry*, 181, 333-338.

Nguyen N., Fargues C., **Guiga W.**, Lameloise M.-L. (2015). Assessing nanofiltration and reverse osmosis for the detoxification of lignocellulosic hydrolysates. *Journal of Membrane Science*, 487, 40-50.

Nguyen M., **Guiga W.**, Vitrac O. Modeling of transport properties from dry to wet/swollen polymers. Journées Techniques du Club Français des Membranes - Modélisation moléculaire et filtration membranaire, 16 Mars 2015, Paris, France. Communication orale.

Nguyen P.-M., **Guiga W.**, Vitrac O. Molecular modelling a versatile tool to predict excess chemical potentials and mass transfer properties in food and food packaging. 6th International Symposium on Delivery of Functionality in Complex Food Systems, July 14-17th, 2015, Paris, France. Communication orale.

**Rakotozafy L.**, Relmy O., Rott P., Celhay F., **Potus J.**, **Nicolas J.** (2015). Relation entre la composition en oses et oligosides de différentes farines de blé et l'activité des glucides oxydases mesurée dans les extraits aqueux de ces farines, *Industries des Céréales*, 195, 07-13.

Cordella C.B.Y., **Garcia R.**, **Boussard A.**, **Rakotozafy L.**, Rutledge D. N., **Potus J.**, **Nicolas J.** (2015). Suivi de la structuration de la pâte à pain grâce au couplage entre Spectroscopie de Fluorescence Frontale et Analyse en Composantes Indépendantes. *Annales des Falsifications, de l'expertise chimique & toxicologique*, 983, 38-48.

Azagoh C., Merai M., **Garcia R.**, **Rakotozafy L.**, Cuvelier M.-E., Keller S., Lewandowski R., Ducept F., Mezdour S. (2015). Insect's proteins and lipids for feed and food industries. Poster présenté au 12th International Congress on Engineering and Food, June 14-18<sup>th</sup> 2015, Québec, Canada.

Dupoiron S., Rakotoarivonina H., Allais F., **Pommet M.**, Lameloise M.-L., Rémond C. (2015). Enzymatic deconstruction of wheat bran xylans by a thermophilic bacterium, *Thermobacillus xylanilyticus*, to produce valuable molecules. Poster présenté au 3<sup>rd</sup> International Symposium on Green Chemistry, May 3-7<sup>th</sup>, 2015, La Rochelle, France.
